Synthetic submission 001

Typed demonstration only; not a real student's work.

1(a). Which unit measures speed? Choose one: (1) m; (2) m/s; (3) s; (4) m/s^2.

2(a). A cart moves at a constant speed of 4 m/s for 3 s. Find the distance traveled, showing your relation.

2(b). At the same speed, how far does it travel in 9 s? Explain the time scaling; you may use your result from 2(a).

1(a): option 2, m/s.

2(a): s = v t = 4 m/s x 3 s = 12 m.

2(b): 9/3 = 3, so the distance triples: 3 x 12 m = 36 m.
