Synthetic submission 002

Typed demonstration only; not a real student's work.

1(a). Which unit measures speed? Choose one: (1) m; (2) m/s; (3) s; (4) m/s^2.

2(a). A cart moves at a constant speed of 4 m/s for 3 s. Find the distance traveled, showing your relation.

2(b). At the same speed, how far does it travel in 9 s? Explain the time scaling; you may use your result from 2(a).

1(a): [synthetic ambiguous final mark between options 2 and 3; no reliable intended choice].

2(a): s = v t = 4 x 3 = 10 m.

2(b): 9/3 = 3, so 3 x my 10 m = 30 m.
